Main Web Page

We use the power of science and forensic medicine to establish a fact-based record of human rights abuses.

We enable front line human rights defenders to expose violations and hold perpetrators accountable.

We use our authoritative voice to protect human rights and end impunity for perpetrators.

The Syrian government has targeted health care workers with detention, abuse, and torture. Here are some of their stories.

We investigate and document human rights violations, give voice to survivors and witnesses,

Excited delirium cannot be disentangled from its racist and unscientific origins and

PHRs Asylum Program offers basic and advanced trainings for health professionals to
