Mission Statement

Intact America is the largest national advocacy group working to end child genital cutting (baby boy circumcision) in America to ensure healthy sexual futures for all people.

Intact America fulfills its mission by challenging social and sexual norms and by advocating for the health and wellbeing of all children and the adults they will become.

We do this through creative messaging, advocacy, education, public policy reform, and the empowerment of our supporters, partners and volunteers.

Intact America envisions a world where children are free from medically unnecessary surgeries carried out on them without their consent in the name of culture, religion, profit, or parental preference.

We are passionate.

We are professional.

We are principled.

We are honest.

We are strategic.

We are uncompromising.

Intact America operates as a not-for-profit organization based in Tarrytown, NY that is tax-exempt under Section 501(c)(3) of the Internal Revenue Code.
