This fact sheet, which references research on how solitary confinement affects the mental health of prisoners with and without underlying mental illness, was written by Sal Rodriguez, who is working with Solitary Watch this summer as a reporter/researcher. Sal is a student at Reed College and has completed internships with the Drug Policy Alliance and the Partnership for Safety and Justice. Watch for more fact sheets from Sal as the summer continues!

James Ridgeway (1936-2021) was the founder and co-director of Solitary Watch. An investigative journalist for over 60 years, he served as Washington Correspondent for the Village Voice and Mother Jones, reporting domestically on subjects ranging from electoral politics to corporate malfeasance to the rise of the racist far-right, and abroad from Central America, Northern Ireland, Eastern Europe, Haiti, and the former Yugoslavia. Earlier, he wrote for The New Republic and Ramparts, and his work appeared in dozens of other publications. He was the co-director of two films and author of 20 books, including a forthcoming posthumous edition of his groundbreaking 1991 work on the far right, *Blood in the Face*. Jean Casella is the director of Solitary Watch. She has also published work in The Guardian, The Nation, and Mother Jones, and is co-editor of the book *Hell Is a Very Small Place: Voices from Solitary Confinement*. She has received a Soros Justice Media Fellowship and an Alicia Patterson Fellowship. She tweets @solitarywatch.

Accurate information and authentic storytelling can serve as powerful antidotes to ignorance and injustice. We have helped generate public awareness, mainstream media attention, and informed policymaking on what was once an invisible domestic human rights crisis.

Only with your support can we continue this groundbreaking work, shining light into the darkest corners of the U.S. criminal punishment system.
