Mission Statement

We investigate and document human rights violations, give voice to survivors and witnesses, and plant seeds of reconciliation by ensuring that perpetrators can be held accountable for their crimes.

We believe that medical ethics are deeply bound to the protection of human rights. PHR uses our core disciplines science, medicine, forensics, and public health to inform our research and investigations and to strengthen the skills of frontline human rights defenders.

We work closely with hundreds of partners around the world, using facts to wage effective advocacy and campaigning and providing critical scientific evidence so that survivors can seek justice.
