Policy Issue Resources

CVT's core policy initiatives focus on advocating for access to fair asylum and refugee systems for survivors of torture seeking protection in the United States. To do this, CVT's Policy team uses multiple strategies to shine a light on the experiences of asylum seekers and refugees before Congress and before the public.

A staggering number of refugees and asylum seekers are torture survivors. While our clinicians work to heal their wounds, our policy team advocates for just and humane systems through which refugees and asylum seekers and the survivors among them can seek protection in the United States, consistent with their fundamental human rights and the United States legal obligations. The policy team's public education and advocacy emphasize the real-life experiences of CVT's clients.
